The Brazilian Society of Endodontics (Sociedade Brasileira de Endodontia - - SBendo) has, as a pillar, the union and the strengthening of the Brazilian Endodontics, basing its actuation on the incentive and scientific, didactic, and professional improvement of its associates. Thus, since its foundation in 2009, the society annually organizes the International Congress of SBendo.

In 2020, the challenges posed by the pandemic led the organization of the 12th International SBendo Congress to hold its first virtual edition, a major milestone and a technological Revolution. With more than 1500 participants, SBendo has shown that even in the most difficult times, the search for the scientific improvement of its members is a priority for the institution. Keeping its commitment with Endodontics and concerned in always establishing the specialty as one of the notable responsible for promoting health in individuals, the society announces with serenity and safety the 13<sup>th</sup> International Congress of SBendo in the city of Curitiba/PR, from November 18<sup>th</sup> to 20<sup>th</sup> of this year.

Besides the scientific improvement with great names of national and international Endodontics, the participants of the congress can enjoy the city of Curitiba, a great destination for weekend tourism. The city is easy to get around and there are plenty of options to do in the capital of Paraná state.

In 2021 SBendo and the city of Curitiba are waiting for you!!!

## **Marco Antônio Húngaro Duarte<sup>1</sup>, Flares Baratto-Filho<sup>2</sup>**

<sup>1</sup> President of SBendo.

<sup>2</sup> President of the 13th International Congress of SBendo.
